4Life Transfer Factor®

Educate Your Immune System

THE SMART CHOICE FOR GOOD HEALTH

What does living your best life mean to you? Is it enjoying good health? Achieving your goals? Spending quality time with family and friends?

When you feel your best, you can live your fullest life—however you define it. Feeling great starts with a healthy immune system. Your immune system plays an important role in your health by protecting and healing your body from environmental stresses and traumas.

EDUCATE YOUR IMMUNE SYSTEM

Getting an education is an important part of being successful in life. You send your children to school to give them the best possible chance to succeed.

When you supplement your healthy lifestyle with 4Life Transfer Factor® products, you're giving your immune system the support it needs to function optimally.

4Life Transfer Factor products educate your immune system to:

1. **Recognize** environmental stresses more effectively
2. **Respond** more efficiently after a threat has been identified
3. **Remember** how to act the next time a problem is encountered

HOW 4LIFE TRANSFER FACTOR® PRODUCTS EDUCATE YOUR IMMUNE SYSTEM

Immune system education starts with a mother and a nursing baby. When babies are first born, they have underdeveloped immune systems. When a baby is fed colostrum or “mother’s first milk,” the mother transfers immune knowledge to her baby. This is called “passive immunity” because the mother is “passing” or “transferring” her immunity to her child. The passive immunity helps educate the baby’s inexperienced immune system.

Colostrum is especially rich in proteins that can be transferred from one immune system to another—and from one mammal to another. One type of protein discovered in colostrum is called transfer factor. 4Life Transfer Factor is sourced from cow colostrum and chicken egg yolks. Through innovation, 4Life® harnesses transfer factor proteins from these sources to create a product that offers continuing immune system education for you and your family.

Test results obtained from an independent, unpublished *in vitro* experiment conducted at the Russian Academy of Medical Sciences, in Kazhirkoe Shosse, Russia. The randomized and controlled *in vitro* study assessed the effects of 4Life Transfer Factor® Classic, 4Life Transfer Factor® Tri-Factor® Formula, or 4Life® Transfer Factor Plus® Tri-Factor® Formula, versus a positive control (Interleukin-2, or IL-2) on NK cell activity and effectiveness in destroying damaging cells. Blood was collected from healthy volunteers and then incubated for up to 48 hours. (REFERENCE: Kiselevsky MV & Khalurina EO. Unpublished observations)

SMART CHOICES FOR YOUR IMMUNE SYSTEM

Supporting your immune system and experiencing optimal health are important components of living a full life. 4Life offers a variety of ways for you and your family to get your daily serving of 4Life Transfer Factor® immune system support.

SMART RESEARCH FOR SMART PRODUCTS

4Life® is committed to ongoing research in immune system support. The company works to guarantee product safety and efficacy through academic associations, scientific publications, and exploratory research.

Research is reinforced through our commitment to innovation and substantiation. Our Research and Development team is dedicated to creating products that offer superior support for overall wellness, while maintaining the highest standards of quality and testing.

CERTIFIED AND GUARANTEED

When you purchase a 4Life product, you can rest assured that you are getting the very best in immune system support. Every 4Life Transfer Factor® product includes our commitment to quality in the areas of identity, purity, strength, and composition.

4Life has invested over a million dollars in state-of-the-art laboratory equipment to create one of the most advanced analytical and quality labs in the health supplement industry—similar to what you would find in pharmaceutical labs. In fact, 4Life performs no fewer than 20 analytical tests before releasing a product for distribution. These tests ensure that each product meets 4Life's strict specifications for product quality.

“We will continue to be at the forefront of discovery, as expressed by our investment in patents, exploratory research, academic associations, and publications, and with the expertise of our Health Sciences Advisory Board and in-house Research and Development team.”
