To support normal life quality and long-term health in dogs receiving regular veterinary care.

**FOR ORAL USE ONLY IN CANINES RECEIVING REGULAR VETERINARY CARE**

A dog’s enhanced overall wellness is commonly reported and may include vitality, increased activity and vigor. Promoting normal apoptosis levels may aid in patient health and quality of life. Licensed veterinarians, visit our veterinary portal at www.FunctionalNutriments.com/vet to see clinical case studies, including before and after images.

Results can occur as early as seven days after starting Apocaps, but may take up to 3-4 weeks in certain dogs.

**Active Ingredients**

- Dietary apoptogen polyphenols, apigenin, curcumin, silymarin, and gingko
- Immune support: beta glucans, zinc, magnesium, glutamine
- Organ support: taurine (cardiac), glutamine and gingerols (GI), liver (silymarin), kidneys (magnesium)

**Dosing**

Directions for use:

- 5-10 lbs: 1 capsule twice daily
- 10.1-20 lbs: 2 capsules twice daily
- 20.1-40 lbs: 3 capsules in the AM and 2 capsules in the PM
- 40.1-60 lbs: 3 capsules twice daily
- 60.1 lbs and over: 3 capsules three times daily

To maximize effectiveness and minimize the possibility of digestive upset, it is recommended that Apocaps be dosed with a small amount of food.

**Precautions**

(FOR CANINE USE ONLY. NOT FOR USE IN FELINES OR OTHER SPECIES)

- Dogs with the following conditions should not receive Apocaps of this capsule strength:
  - Those with known allergic reactions to ingredients contained in Apocaps
  - Those experiencing vomiting or diarrhea
  - Those weighing less than 5 pounds

For concurrent use of Apocaps with NSAIDS, corticosteroids, or oral chemotherapy drugs: Use half the dose of Apocaps when chemotherapy before Apocaps and to screen for intolerance to those drugs.

Side effects with the use of this product are extremely rare but may include vomiting, diarrhea or loss of appetite.

Apocaps® is a first-in-class nutraceutical. Its formula is designed to enhance the quality of life and longevity for dogs as a stand-alone palliative supplement or as a synergistic part of comprehensive care.

- Apocaps induces apoptosis with its unique formula of apoptogens including Luteolin, Apigenin, Curcumin, Silymarin and Gingerols. Peer-reviewed publications have shown these apoptogens promote direct anti-cancer effects in vivo and are highly safe for use.
- The constituents in Apocaps work on extrinsic and intrinsic multi-target pathways to effectively induce and promote apoptosis at multiple sites, thus maximizing the desired effect.

The apoptogens in Apocaps® act on different molecular sites simultaneously, including caspases, p53, RAS, the B protein family, and death receptors in parallel. Since cancer cell DNA is unstable and mutates away from cell death, multiple molecular targets increase the likelihood of cancer cell suicide.

- To enhance bioavailability, Apocaps uses Biovadex™, a patent-pending and proprietary approach.
- Apocaps is synergistic with existing therapeutics such as chemotherapy and radiation. It has been used in thousands of dogs in the U.S. and internationally since 2010.

The science behind Apocaps has been vetted by the National Institutes of Health in Washington. Functional Nutriments was awarded a grant to: Develop Cancer Chemosensitizer & Radiosensitizer Using Bioavailable Dietary Apoptogens.

- Apocaps is manufactured in the United States using 100% human grade, natural ingredients. Our facility is licensed and inspected by the FDA.

- Extensive testing, analysis and certification processes are performed on every batch to ensure standardized safety and purity.
